

## 224 Snagging list

### **Söemtron ETR 224 Circuit diagrams - Snagging list**

The following list is for connections and signals for the – **circuit diagrams** - that need checking during the reverse engineering of the Söemtron ETR 224 Calculator. It is provided solely as an information source as to the current problems that need investigating.

This list changes continually without notice.

Note - nets with a backslash ( \ ) are negative logic.

**Photo amplifier board** – none

**Solenoid driver board** – none

**Printer assembly** – none

**Power supply** – none
