General Description

The FND350, FND360, FND357 and FND367 are red GaAsP 7-segment LED displays with a 0.362-inch character height. These displays are designed for applications in which the viewer is within fifteen feet of the display.

Compact—10 Digits In 3-Inch Panel Width

Low Current Requirements 2-20 mA/Segment

Low Forward Voltage— $V_F = 1.7$ V

Intensity Code Marking For Uniform Displays

Maximized Contrast Ratio With Integral Lens Cap

FND360, FND367 Suitable For Use In High

Notes

1. Typical operating current under single digit (dc) drive is approximately 2 to 20 mA average per segment for most ambient light conditions. The 125 mA specification is a representative peak current.
2. Measured on mechanical axis of package. See Average Luminous Intensity curve for other forward currents.
3. Segment-to-segment from average segment intensity.
